

HOT OIL PROBLEMS...

HEATERS, REACTORS, TEMPERATURE CONTROL EQUIPMENT

WHO YA GONNA CALL?

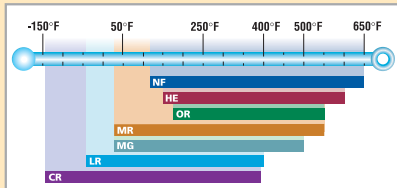

SLUDGE BUSTERS™

You may need a cleaner or you may need to change your heat transfer fluid - It's tough to tell the difference...

Flush your whole system? Clean it on the fly? Could be a tough call to make. The easy call is to one of our SludgeBusters at Paratherm for technical advice. Somebody who knows systems, not just fluids, and knows your industry and its equipment too. Knowing how to get the most out of a fluid is where Paratherm shines. Some would have you think that all heat transfer fluids are the same. That's only partially true. Many fluids offer substantial performance and efficiency advantages as well as longer life. The web site has all the "techy" details. All you gotta remember is to make the call.

Temperature chart for selecting Paratherm brands.

SUMMER MAINTENANCE

20% OFF CLEANERS

Stop potential system problems that impact your production. Paratherm cleaners clean your system on the fly (or overnight), safely and easily. They dissolve and suspend carbon lumps and sludge. Call today, the 20% off offer is good til September 30th.
